

Invacare CS8 floorline bed

The Invacare CS8 bed is a fully-featured electric floorline bed with one button chair positioning, attendant panel, under bed lighting, backup battery and an ultra low 150mm low height.

Features :

- Total safe working load (SWL) of the bed 250Kg.
- Linked braking on head and foot ends
- Electrically adjusted height range. The bed works within a height range of 150mm low height to a maximum high height of 680mm.
- Trendelenberg head and foot down tilt 14°.
- Four sectioned electronically operated mattress platform with independent adjustment of backrest angle (maximum 65°) and knee section angle (maximum 35°).
- Auto-regression backrest for reduced shear and friction.
- Integral foot end mattress base extension. Extends the bed by 195mm.
- (Optional) bolt on 3/4 length folding side rails.
- Removable timber head and foot panels.
- One button chair positioning.
- Under bed lighting.

Invacare CS8 floorline bed

The Invacare CS8 bed offers a range of positional movements and additional features including auto-regression backrest and linked braking that assist caregivers and provide for patient comfort. The bed includes as standard: back-up battery, under bed lighting, and attendant control panel.
